

'No Limits' @ HUS

PSYCHOLOGY

Identification of students:

Criteria: *(including parent, student nominations, teacher nominations and a variety of data)*

Students are selected on the basis of promise demonstrated in lessons and measured improvement throughout the academic year. In addition we will use students allis data and or grades in science, English and maths. As modules are completed this data will also be used.

Review:

"no limits" students are reviewed after AFL work. Any students who are actively developing their work at this level would also be considered.

Notification:

Students and parents will be notified as and when their work and aptitude reaches the appropriate level. This would always be discussed with students and parents in lessons or at parents evening.

Curriculum opportunities with 'No Limits' :

No limits students would have the opportunity to extend their knowledge of psychology in action through research projects that occur periodically throughout the year.

The research is designed to develop not only knowledge but also their skills in psychology, understanding of material and encourage independent learning in psychology.

Enrichment opportunities with 'No Limits':

Psychology students will be encouraged to use psychology review and to use our library of books to extend their knowledge and understanding of psychology and to widen their horizons in this subject area.
